# Our History

---

With Junkwize, we have created a highly professional, environmentally-friendly rubbish removal company. However, getting to this point was easier said than done. Junkwize was established in 2012 with a fleet of only one van. We have now grown our reputation and are proud to be working in close proximity with London's most reputable companies, providing an extended service to their rubbish removal needs. We now have access to a large fleet of grab lorries, skips and Ro-Ro containers. Those responsible for creating the reliable and trustworthy rubbish removal company that you know today are our two directors:

## Mike Grindy

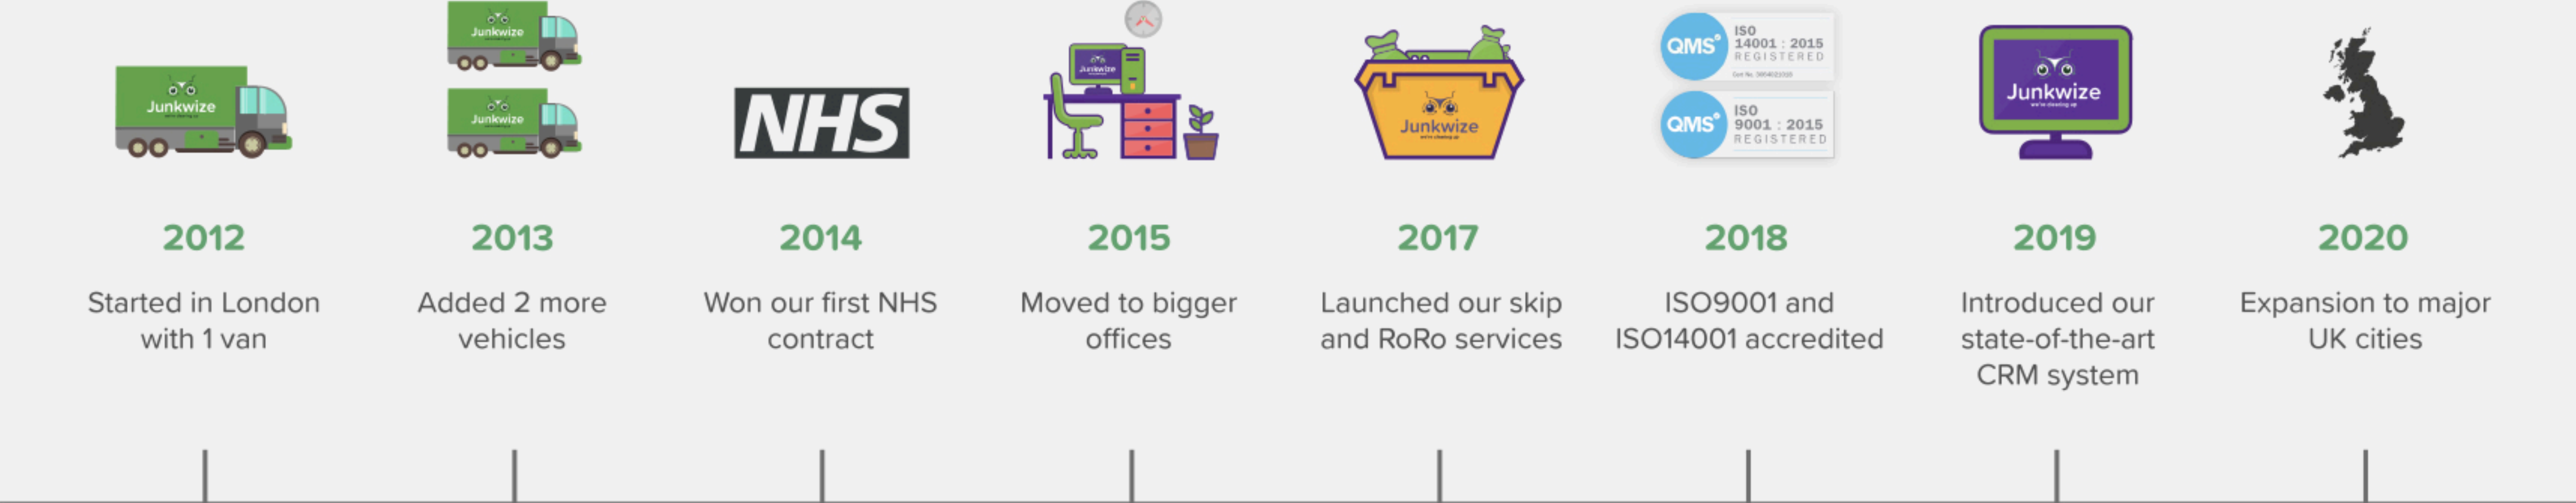

Mike was running his own digital agency in 2012 and started Junkwize after delving into available data and gaining deep industry insight. Careful planning went into all aspects of what makes a well-branded and professional rubbish removal business. He purchased the first environmentally-friendly van and created a company that emphasises a sound blend of accountability, transparency, and a deep regard for the environment. Junkwize share Mike's agenda in not just being willing to serve to the required standards, but to go beyond and to share best ideas and practices with clients. The business has continued to grow through effective digital marketing and customer service.

## Alessandro Maccioni

Originally from Sardinia, Alex moved to London in 2000. He quickly worked his way up in the restaurant business where he managed various fine-dining restaurants, including Celebrity Chef Venues, over a career spanning 12 years. At first meeting with Mike it was clear they both shared a passion to fill a gap in the waste management industry, and wanted to establish an honest, transparent and dependable company where customers needs are always central. Alex oversees all Junkwize departments on the day-to-day operation, always bringing new ideas to the table to increase efficiency and reduce environmental footprint. He looks after the long-term strategy of the business.

# Our Achievements

Since our foundation in 2012 we have been growing steadily. Thanks to the demand for our niche offering and with the help of our generous investors, we were able to expand our fleet with two new vans as early as 2013. After winning our first big contract with the National Health Service, we were able to move to bigger offices and expand our offering. In 2018, we became ISO9001 and ISO14001-accredited, meaning we officially meet the international standard for quality management systems (QMS) and effective environmental management systems (EMS). 98% of the rubbish we remove is diverted from landfill. From 2019 onwards, we've started expanding our business even further, introducing a state-of-the-art management system to facilitate our expansion to major UK cities.

# What We Offer

Junkwize provides adaptable light and heavy duty vehicles that are highly accommodating in terms of space and weight allowances. Our working hours are convenient to both domestic customers and all business sectors. We are happy to say that we are equipped to provide an effortless 24/7 service in order to satisfy the requirements of your site. Out of hour pick ups can be arranged by pre-booking with one of our agents and your rubbish will be removed as effortlessly and stress free as if you booked our working hours service. We have a commitment to honour next day services within an accurate time window.

Our dedicated and seasoned drivers are able to provide diligence, efficiency and initiative when assessing the needs of the most complex of commercial and construction sites. We also have the additional services of skips, grabs and ROROs for the more demanding waste scenarios. We have a range of skips to choose from and can organise delivery, permits and collections at a date and time suitable for you.

We think carefully about what is important to you, what is the most effective and least disruptive method to conduct the clearance and how we can continually improve our own green recycling targets.

# Our Customers Say

“ They delivered an estimate very quickly, which was impressive. Then they arrived on time, were efficient and courteous, and, most incredible of all, followed the instructions we gave them to reach our building! What delivery driver does that? Will use them again, and would recommend them thoroughly, without reservation. ”

# What Our Customers Say

“This is the third time we have used you. Fantastic service. Your operators are very pleasant and professional and nothing is too much trouble for them. Polite and cheerful. It is a pleasure to work with them. Just like to give a special mention to Teo - what a lovely chap. That doesn't take anything away from the others. Will never use anyone else.”

# Commercial

We're proud to offer a wide range of services to assist your commercial removal requirements. For small-scale and agile rubbish removal jobs, we have our own fleet of vans as well as our own crew on hand to help load your business' rubbish as quickly and efficiently as possible.

If you feel that your requirements cannot be met by one of our removal vans, we are able to offer you a variety of Skips in many different sizes, ranging from 4 yards right through to 12 yards. Skips are a fantastic rubbish removal solution if you have a business which accrues lots of very heavy, loose waste like rubble and soil. We're fully aware that hiring a skip isn't always straightforward as there are various regulations that must be adhered to.

At Junkwize we always ensure that all permits and legislation are addressed for all of our clients. We're also able to find solutions for IT, hazardous and difficult waste.

## Excellent service and great value for money

"Professional, friendly staff and incredibly reasonable rates. Alex was always available and very helpful. The guys cleared the rubbish very quickly and with no hassle. We will definitely be using them again."

# Miscellaneous

At Junkwize, we are proud to be qualified to deal with more complex removal needs too. If your business or household needs to dispose of Waste of Electrical and Electronic Equipment (WEEE), we can protect the environment as well as your privacy by dismantling electronic waste for spares or recycling and destroying hard drives securely in accordance with DOD standards and the Data Protection Act 2018.

We are aware that some waste contains chemicals that are harmful to the environment; it may leak toxins into the earth and our water systems when simply dumped into a landfill. Our team is equipped to dispose of hazardous waste safely and securely, and an impressive 98% of the rubbish we remove is diverted from landfill.

This British agricultural sector also relies on our services: we can take large quantities of biological waste to be composted or otherwise accurately disposed of.

### These guys were great

These guys were great! Very helpful with a "can-do" attitude and got a difficult job done in a short space of time. Based on this experience, I would thoroughly recommend Junkwize as a well-organised and professional company who are easy to deal with.

# How We Work

# Our Experience

By working on large-scale projects such as The Science Museum, Tesla UK, St Georges Hospital Tooting, The Dorchester Hotel and high-net-worth individuals' private properties, we have gained experience satisfying a wide range of client needs. We appreciate that all waste situations are unique and our managers plan every single aspect of the project with care and attention to the smallest detail.

## Our Compliance

We value the welfare of our staff, our clients and members of the public. To ensure everyone's wellbeing in our operations, we employ Citation for all our Health & Safety matters. We're proud to be a SafeContractor, as well as ISO9001 and ISO14001-approved.
